

PATENT COOPERATION TREATY
UNITED STATES RECEIVING OFFICEApplicant:
Ben Jones et al.International Application No:
PCT/US00/040038International Filing Date:
16 March 2000Earliest Priority Date:
17 March 1999Title: **SENSOR**§ Attorney Docket: **IO-1009US****PRELIMINARY AMENDMENT**

With the transmission of the filing of the referenced application under 35 USC 3.71,
Applicants submit the following Preliminary Amendment.

In the Claims

Please delete the originally filed claims 1-27.

Please add the following new claims and proceed with the national examination
procedures under 35 USC 3.71:

1 28 1. An apparatus for recording environmental data measurements, comprising:
2 a sensor for detecting environmental data;
3 a controller for controlling the operation of the sensor, the operation of the sensor
4 including a plurality of operation modes automatically selected by the controller.

1 29 2. The apparatus of claim 1, wherein the controller further comprises:
2 a front-end circuit coupled to the sensor;
3 a loop filter coupled to the front-end circuit;
4 a multiphase clock generator coupled to the front end circuit and the loop filter;
5 a startup sequencer coupled to the loop filter and the multiphase clock generator;
6 a sensor simulator for simulating the performance of the sensor coupled to the startup
7 sequencer, the multiphase clock generator, and the front-end circuit; and
8 an overload detection device coupled to the loop filter and the startup sequencer.

1 30 3. The apparatus of claim 1, wherein the controller comprises:
2 a front-end circuit for providing electrostatic forces and position sensing for a
3 measurement mass in the sensor, the front-end circuit including:
4 a plurality of switches for controlling the operation of the sensor; and
